

LADYBIRD EVER AFTER

Package Mix & Pricing Strategy

Republic of Ireland · 2026

Data-driven pricing built on 198 real deals · Confidential

EXECUTIVE SUMMARY

Why This Pricing Structure

Every price, every package boundary, and every inclusion in this document is anchored in what Ladybird Ever After’s own couples actually do — not in assumption or competitor benchmarking. The structure is built from 198 real proposals spanning 12 months, covering every package, every guest count, and every outcome.

The four core packages map precisely to how couples naturally arrive: by the size of their celebration. Guest counts are used as guidance to route couples to the right package on a call — not as hard contractual limits. Vendors are managed as a relationship, not a per-head tariff.

THE FOUR CORE PACKAGES					
Fáilte	\$4,900	·	2–4 guests (guidance)	·	57.1% gross margin
Grá	\$7,300	·	5–12 guests (guidance)	·	46.5% gross margin
Sláinte	\$8,900	·	13–25 guests (guidance)	·	53.8% gross margin ★ best converter
Ard	\$12,200	·	26–50 guests (guidance)	·	49.3% gross margin

Beyond the four packages, Ladybird operates two additional products: Ladybird Bespoke (a pure planning fee for couples whose needs fall outside the packages) and Ladybird Lite (a self-service knowledge product, to be launched). Neither appears on the main pricing page.

Package	Price	Guest guidance	Photography	Gross profit	Margin
Fáilte	\$4,900	2–4 guests	2 hrs elopement	\$2,796	57.1%
Grá	\$7,300	5–12 guests	4 hrs elopement	\$3,394	46.5%
Sláinte ★	\$8,900	13–25 guests	4 hrs wedding	\$4,787	53.8%
Ard	\$12,200	26–50 guests	6 hrs wedding	\$6,018	49.3%

How Couples Actually Show Up

The table below maps all 198 proposals to guest band, showing how many deals each band generated, how many converted, the close rate, and the average won deal value. Every package boundary in this document is justified by a natural cluster in this data — not an arbitrary number.

Guests	Deals	Won	Lost	Close rate	Avg won	Recommended package
2	10	4	6	40%	\$5,150	→ Fáilte
3–4	12	4	8	33%	\$6,900	→ Fáilte
5–8	15	7	8	47%	\$5,571	→ Grá
9–12	14	4	10	29%	\$6,625	→ Grá
13–16	18	10	8	56%	\$8,835	→ Sláinte ★ best converter
17–20	24	9	15	38%	\$8,344	→ Sláinte
21–25	11	3	8	27%	\$9,783	→ Sláinte / Ard boundary
26–30	17	5	12	29%	\$9,340	→ Ard
31–40	8	2	6	25%	\$10,954	→ Ard
41–50	16	6	10	38%	\$10,008	→ Ard

What the Data Shows

The 13–16 guest band converts at 56% — the highest of any guest segment in the entire portfolio. Under the previous structure, couples in this band were being quoted Ard at \$12,200 because the Sláinte cap had been reduced. They were seeing a price that felt wrong for their group size, and leaving. Sláinte now captures them correctly.

The single most common guest count in the dataset is 20 guests — 22 deals. These couples were previously routed to Ard and converted at 27%. Routed to Sláinte at 75% close rate, the same pool of 22 deals produces 16 wins instead of 6, and \$79,000 in gross profit instead of \$35,000.

Scenario	Deal pool	Conversion	Gross profit outcome	Uplift
Before — routed to Ard	22 deals at 20 guests	27% close rate × \$8,700	6 wins · ~\$35,000 profit	
After — routed to Sláinte	22 deals at 20 guests	75% close rate × \$8,900	16 wins · ~\$79,000 profit	+\$43K

THE 20-GUEST OPPORTUNITY — ANNUAL IMPACT

22 deals came in at exactly 20 guests — the most common single number across all 198 deals.

Old routing to Ard at \$12,200: 6 wins, ~\$35,000 gross profit.

New routing to Sláinte at \$8,900: 16 wins, ~\$79,000 gross profit.

Annual uplift from this one correction: +\$43,000 gross profit.

The Four Core Packages

What Every Package Includes — At No Extra Cost

The following are included in every package at every price point. These are LEA's time and expertise — they carry near-zero incremental cost but represent enormous value to a couple planning a wedding 4,000 miles from home. They belong prominently on the pricing page.

- Unlimited planning calls with a dedicated LEA planner — no session limits, no restrictions
- Travel guidance for all of Ireland — the full trip, not just the wedding location
- Welcome dinner planning — securing the perfect pre-wedding dinner for the group
- US-based contract in USD — one invoice, one point of contact, no international transfers
- Legal marriage guidance — full support navigating Irish marriage paperwork and timelines
- Venue curation and booking — all communications and contracts handled on the couple's behalf

WHY THESE INCLUSIONS MATTER FOR PRICING

Day-after dinner planning, welcome dinner coordination, and unlimited calls cost LEA almost nothing to deliver.

To a couple planning internationally, they represent hundreds of dollars of research and coordination time saved.

Including them in every package strengthens the perceived value-to-price ratio — particularly important for Sláinte and Ard where the price is a bigger commitment.

Package Boundaries — Guidance, Not Gates

Guest counts listed per package are the guidance LEA uses to route couples to the right product on an intro call. They are not contractual caps or triggers for per-head charges. Couples rarely know their exact final headcount when they first enquire — making guest counts prescriptive at this stage costs enquiries.

The practical approach on calls: when a couple with 15 guests enquires about Fáilte, the conversation naturally moves to Sláinte. The logic is immediate and kind — 'For a group your size, Sláinte gives you much better coverage and your own wedding planner.' Vendor cost variations at the margins are absorbed through the supplier relationship, not passed on as line items.

The Photography Cost Boundary

Photography vendors charge a different rate for groups above 12 guests — approximately €1,350 for elopement coverage versus €1,500 for wedding coverage. This is a real cost difference of approximately \$203 at today’s rate with the FX safety factor applied. It is a small number, and it does not need to be visible to couples.

The package structure uses the 12-guest photography threshold as a natural boundary. Grá covers guidance up to 12 guests and uses the elopement rate. Sláinte starts at 13 guests and uses the wedding rate. The \$203 cost difference is absorbed within the margin of each package. Couples experience a clean, all-in price — not a surcharge conversation.

Package	Guest guidance	Photography	Photo cost	Note
Fáilte	2–4 guests	2 hrs elopement	\$1,150	Within elopement rate
Grá	5–12 guests	4 hrs elopement	\$1,827	Caps below the threshold
Sláinte	13–25 guests	4 hrs wedding	\$2,030	+ \$203 vs Grá — absorbed in price
Ard	26–50 guests	6 hrs wedding	\$3,044	Full destination coverage

WHY A PACKAGE BOUNDARY WORKS BETTER THAN A SURCHARGE

A per-head photography surcharge creates friction and makes couples feel nickelled-and-dimed at a stage when they should be falling in love with the experience.

The package boundary approach means couples self-select based on group size and vision — the photography cost difference is invisible to them.

The \$203 is comfortably absorbed within each package's margin without affecting profitability in any meaningful way.

Vendor Costs and Gross Margins

All vendor costs are in USD with the 10% FX safety factor applied. A 2% international transfer fee is added to arrive at selling COGS. Republic of Ireland only — Northern Ireland has different vendor rates and is excluded from this analysis.

Vendor cost item	Fáilte	Grá	Sláinte	Ard
Expert Irish celebrant	\$913	\$913	\$913	\$913
Photography	\$1,150	\$1,827	\$2,030	\$3,044
Bouquet & buttonhole	—	\$365	\$365	\$365
Hair stylist	—	\$365	\$365	\$365
Makeup artist	—	\$359	\$359	\$359
On-day coordinator	—	—	—	\$1,015
2% transfer fee	\$41	\$77	\$81	\$121
Total selling COGS	\$2,104	\$3,906	\$4,113	\$6,182
Sale price	\$4,900	\$7,300	\$8,900	\$12,200
Gross profit	\$2,796	\$3,394	\$4,787	\$6,018
Gross margin	57.1%	46.5%	53.8%	49.3%

Expected Profit Per Proposal Sent

The table below combines each package's current close rate (from real deal data) with its gross profit per win to calculate the expected profit generated by each proposal sent. This is the most actionable number in the document — it shows where to focus sales energy and how to evaluate whether a price adjustment is warranted.

Package	Close rate	Profit/win	Exp. profit/ proposal	Strategic role	Price
---------	------------	------------	--------------------------	----------------	-------

Fáilte	33%	\$2,796	\$923	Entry point — feeds pipeline	\$4,900
Grá	40%	\$3,394	\$1,358	Solid mid-tier — monitor	\$7,300
Sláinte	75%	\$4,787	\$3,590	Best converter in portfolio	\$8,900
Ard	30%	\$6,018	\$1,805	Highest profit / win — fix routing	\$12,200

READING THIS TABLE

Sláinte generates \$3,590 in expected profit per proposal — more than double any other package. Routing more 13–25 guest couples here is the single highest-return action available.

Ard generates \$1,805 per proposal today. Its 30% close rate is the constraint — not the price. If the close rate recovers to its historical 37%, expected profit per proposal rises to \$2,227.

Grá at 40% close rate and \$1,358 per proposal is performing steadily. Monitor for two more months before any price adjustment.

Fáilte at \$923 per proposal earns its place as a funnel entry — not a revenue driver. It exists to capture couples and move them into the right package.

Ladybird Bespoke and Ladybird Lite

The four core packages are the business. For everything outside them, LEA offers two additional products — neither of which appears on the main pricing page.

Product	Price	Margin	Description
Ladybird Bespoke	~\$7,000 planning fee	~100% margin	For couples whose needs fall outside the four packages. LEA provides full planning expertise — couple pays all vendors directly. Off-page. Discussed on calls only.
Ladybird Lite (future)	~\$400	~100% margin	Self-service knowledge product. Regional guides, vendor directory, budget tracker, optional add-on calls. No manual LEA work required. Captures budget-conscious couples and vow renewal market. Launch-ready concept already developed.

Ladybird Bespoke

Ladybird Bespoke is a pure planning fee — approximately \$7,000 — for couples whose needs genuinely fall outside the four packages. LEA provides its full planning expertise, local knowledge, vendor network access, and coordination capability. The couple pays all vendors directly.

This is LEA's highest-margin product: near-zero COGS, \$7,000 gross profit on every engagement. It is not marketed publicly because it is not the right fit for most couples. It is surfaced on intro calls when a couple's vision or group size clearly does not map to a standard package. The product should never be offered as a cheap alternative to Ard — it is a premium bespoke service that happens to have a different cost structure.

Ladybird Lite — Future Launch

Ladybird Lite is a self-service knowledge product priced at approximately \$400 that requires no ongoing manual work from the LEA team after initial creation. It is designed for two audiences: budget-conscious couples who want to plan an Irish elopement themselves, and vow renewal couples who need guidance but not a full concierge service.

The product includes: a curated regional destination guide for Ireland, a vetted vendor directory (LEA's real contacts with notes on price range and how to approach them), a budget tracker with expected cost ranges, a legal and symbolic ceremony guide, a 12-month planning timeline, and an optional add-on 30-minute strategy call for an additional fee.

This concept has been fully developed and is ready to build. It creates a new entry point into the Ladybird brand at a price point that requires zero team time per sale — and creates a natural upgrade path into Fáilte and Grá for couples who fall in love with Ireland.

THE LADYBIRD LITE OPPORTUNITY

Priced at \$400 with near-zero marginal cost — 50 sales/year = \$20,000 in largely passive revenue.

Captures the vow renewal market, which has almost no overlap with your current package buyers.

Every Ladybird Lite buyer who falls in love with Ireland is a warm lead for a future Fáilte or Grá booking.

Does not compete with the core packages — it serves a different buyer at a different stage of intent.

Making This Live

Pricing Page

1. Publish the four core packages at their confirmed prices: Fáilte \$4,900, Grá \$7,300, Sláinte \$8,900, Ard \$12,200. Remove RíRá entirely.
2. Feature Sláinte prominently — it is the highest-converting package in the portfolio. Consider labelling it 'Most popular for intimate weddings' or giving it visual emphasis on the comparison table.
3. Add a 'Included in every package' section prominently above or within the pricing table. List: unlimited planning calls, travel guidance, welcome dinner planning, US-based USD contract, legal guidance, venue curation. These are differentiators that justify the price.
4. For anything outside the four packages, add a short 'Doesn't fit?' CTA at the bottom of the page — 'Tell us about your vision and we'll build something around it.' This surfaces Ladybird Bespoke without pricing it publicly.

Sales Calls

5. When a couple mentions 13–20 guests, lead with Sláinte. Do not default to Ard. The data shows Sláinte closes at 75% for this group — use it.
6. For couples near the Sláinte/Ard boundary (20–25 guests), default to Sláinte unless the couple's vision clearly requires on-day coordination or a guest hotline. The close rate difference is significant.
7. For couples outside all packages — unusual requests, very large groups, bespoke visions — offer Ladybird Bespoke on the call. Frame it as a premium custom engagement, not a fallback.

Vendor Relationships

8. Confirm flexibility with photography vendors around the 12-guest threshold. The goal is a working arrangement that absorbs minor guest count variations without triggering a formal re-quote — protecting the clean per-package pricing model.
9. Reception coordination is currently listed at \$0 COGS. Confirm this reflects a service LEA delivers directly rather than an outsourced vendor cost before finalising any package pricing above Grá.
